

HOW COPPER CAN COMBAT POST-COVID19 UNCERTAINTY

AND HOW WE CAN HELP

Copper alloys neutralize viruses & bacteria such as Coronavirus, SARS, and Influenza **within minutes** of contact time.

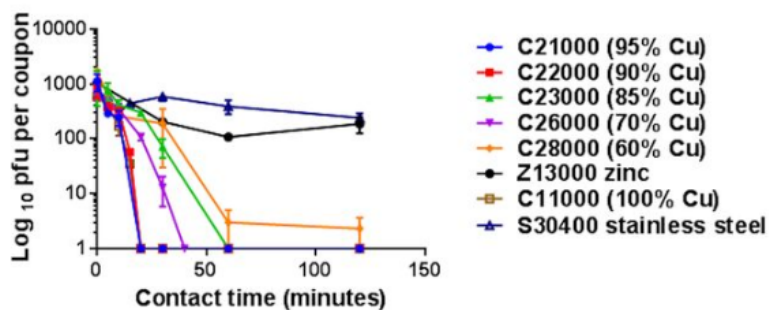

Synergi's Durable Solution
*patent pending

MORE IMPORTANT NOW THAN EVER

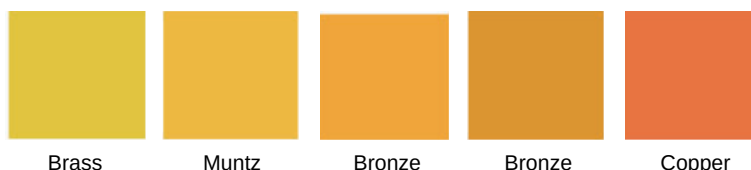

It's going to take a while for public spaces and work places to feel the way they did just a few short weeks ago. And truthfully, they may never be the same again unless necessary precautions are put into place.

Cue **copper sleeves** and its antimicrobial benefits. The chart below highlights rapid inactivation of human coronavirus 229E on different copper alloys compared to other touch surface materials.

Graph published by The American Society of Microbiology. [Click here](#) for the full study.

Adapting the existing built environment with antimicrobial protection such as adding copper sleeves to **railings and door pulls** is an effective way to make employees feel safe on their return to work.

Brass Muntz Bronze Bronze Copper

Range of copper alloys & their finish colors available with antimicrobial functionality.
